

## RTZ802A

### DOOR JAM/WINDOW ANCHOR

Ritz Fall Protection introduces a Door Jamb/Window Anchor, a non-intrusive anchor point that is easily and temporarily installed inside the interior of a building or window. It opens from 24" - 49" wide, by compressing it against the opening, jamming itself between the two vertical sides and then tightening the adjustment knob for a secure fit; enabling the most difficult jobs to get done safely with confidence. This anchor is an essential tool for ensuring safety during construction, transportation, oil & gas, general industry, wind energy, and utilities operations. Its non-intrusive design facilitates secure anchorage in door and window openings, providing a reliable point for SRL or lanyard attachment.

#### FEATURES

- Storage bag
- Lightweight & portable aluminum alloy
- Easily adjustable 23.6" - 49.2"
- Compresses securely within door/window frames
- Lightweight, portable, and a cost-effective option for short-term use on construction sites or other temporary work environments.

#### TECH SPECS

Anchor Type	Door Jam /Window
Material	Aluminum Alloy
Unit Weight	10.5 lbs
Static Strength (Min)	5,000 lbs
Conformity	Meets ANSI Z359.18-2017 standards
