

SAFETY PROJECTORS

Introducing a
**SMARTER
& BRIGHTER**
Standard for Facility Safety

Our versatile safety projectors deliver:

Maintenance-free, crystal-clear markings onto any surface. With plug-and-play setup and a motion sensor option, they are the ultimate durable and intelligent safety communication tool.

Save and Streamline with Safety Projectors

Traditional floor markings like tape and paint are a constant, costly battle against wear and tear, creating clutter and compliance risks. Safety projectors provide a dynamic, durable, and superior solution to illuminate your safety protocols and guide your workforce with precision.

- Eliminate the Recurring Cost and Hassle of Replacements.**
 Stop wasting time, budget, and labor on constantly replacing worn-out tape and repainting faded lines. Our projectors offer a maintenance-free solution that withstands the heaviest foot and forklift traffic, day after day.
- Ensure Unwavering Regulatory Compliance.**
 Project permanent, high-visibility aisle markings and safety zones that explicitly meet OSHA standards (§1910.176, §1910.22). Easily project compliant red for fire equipment and yellow for cautions (§1910.144), ensuring your markings are always audit-ready.
- Gain Unmatched Flexibility and Scalability.**
 Adapt to layout changes, new hazards or updated protocols with adjustable positioning and angles, and replaceable GOBO lenses. Projectors are moveable and reusable, unlike laborious tape or paint.
- Enhance Visibility and Awareness for a Stronger Safety Culture.**
 Cut through the visual noise of a busy facility. Bright, projected messages and boundaries grab immediate attention, reinforce critical protocols, and demonstrate a visible commitment to safety that empowers every employee.
- Drive Operational Efficiency and 5S Excellence.**
 Achieve a new level of organization by decluttering your floors. Project precise pathways and zones without physical obstructions, supporting your 5S initiatives and creating a streamlined, professional workspace that promotes smooth material flow.
- Realize Significant Long-Term Cost Savings and Sustainability.**
 Make a one-time investment that drastically reduces your long-term expenditure on disposable safety consumables (tape, paint, signs). Simultaneously, minimize environmental waste and contribute to your company's green initiatives.

Why AccuformNMC Shines Brighter

Feature	LED Sign Projectors	Typical Competitors
Layout and Technical Planning	Free Site Evaluations & Expert Blueprinting	Little to no implementation support
Warranty & Longevity	5-Year Warranty	1-2 Years (Often as low as 90 Days)
Lamp Life (Hours)	40,000 Hours	30,000 - 35,000 Hours
Performance & Brightness	High-Wattage Options (Up to 600W)	Often limited to 150W
Projection Versatility	Mounting height ranging from 8' to 40', projecting images from 2' to 17'	Limited range, failing at higher mounts or larger image sizes
Certifications & Safety	UL/CUL Certified Models Available	Most lack any safety certifications (N/A)

The Smarter, Simplified Solution for Floor Marking

Expert Site Evaluation

We plan so you don't have to.

Our specialists provide a facility-wide projection plan, ensuring optimal placement and performance for a turnkey solution.

Unbeatable Brightness & Clarity

See the difference in broad daylight.

With high-wattage options exceeding industry standards and precise image adjustment, your messages stay vivid and sharp.

Total Customization

Your message, your way.

From stock safety symbols to bespoke custom lenses and an unlimited color palette, we provide the exact communication tool you need.

Seamless Integration Support

Guidance every step of the way.

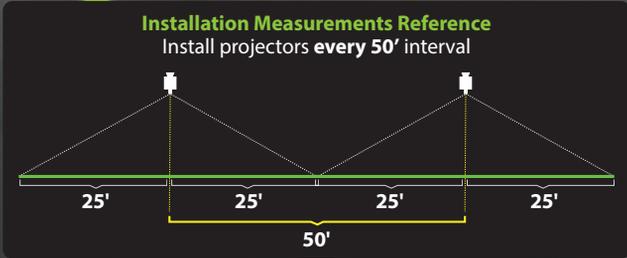

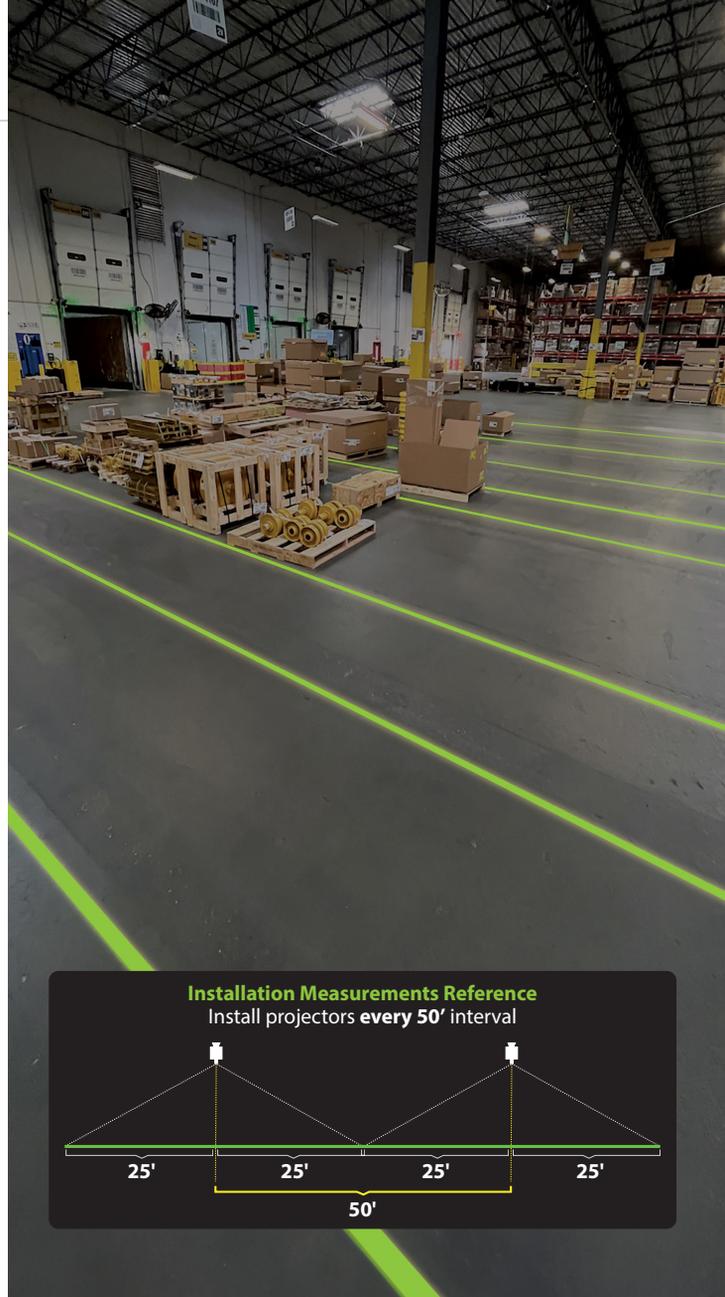

From distance calculators to mounting guidance and easy ordering, our USA-based experts make implementation simple.

Scalable & Versatile

Grow and adapt with ease.

Our systems are designed to work in any environment, from a single hazard point to a full-scale facility rollout.

Our Safety Projector Offering

Products		Dim Environment	Standard Environment	Bright Environment
 <p>LED Sign Projectors</p> <ul style="list-style-type: none"> • 21 Stock and fully customizable lenses, including crosswalk options • Available in Standard & Heavy-Duty options • Up to 40k hours Rated LED Life 		100W	200W	300W
 <p>LED Line Projectors</p> <ul style="list-style-type: none"> • Available in 6 colors • Up to 40k hours Rated LED life • 30ft max mounting height 		100W	100W	200W
 <p>Laser Line Projectors</p> <ul style="list-style-type: none"> • Available in 3 colors • 30ft or higher mounting height 			750mW	Available in 3 colors

Your Blueprint for Safety

Creating effective safety projections isn't as simple as plugging in a projector. Bright lights, incorrect angles or mounting heights, and unclear images can all compromise visibility—making it harder for workers to see and act. These common challenges can lead to repeated adjustments, wasted time, and missed opportunities to improve safety.

Get the Specs Right

Get It Right the First Time

Our team of experts specializes in safety projection systems, offering on-site evaluations and tailored solutions that eliminate guesswork and deliver lasting results. This hands on approach allows us to spec for correct wattage, angles, and mounting heights.

1 Expert Guidance

From layout blueprinting to projector selection, we ensure seamless planning for a system fits your facility's unique needs.

2 Installation Support

Need help with mounting? Ask about installation support for seamless integration.

3 CUSTOMIZE IT!

With our fully customizable GOBO lenses and custom wattages up to 600W, you can display the right safety message at exactly the right time.

- No Setup Fees
- No Minimum Orders
- Unlimited Layout Options
- Translations Available
- Proofs Upon Request

Additional Features

Maximize your safety projector's functionality.

- **Motion Sensor** option increases longevity of projector
- **Image Switch Door Toggle** changes message when doors are opened vs closed
- **Magnetic Installation** hardware
- **Heavy-Duty** option available for harsh environments
