Ditch the Tape
Skip the Paint
Illuminate

Sign Projector

Impervious to wear and tear of facility traffic

Laser Line Projector

Safety and organization with precision

Heavy Duty Sign Projector

Withstands dusty and higher temp environments

LED Line Projector

Ditch the Tape, Skip the Paint

LED Sign Projector

- ✓ Maintenance-free
- ✓ Clear markings onto any surface
- ✓ Plug-and-play setup
- ✓ Safety communication tool

Bright, projected safety messages that eliminate the wear, peeling, and replacement costs of floor tape and signs. Ideal for defining aisles, crosswalks, and hazard zones in everyday industrial environments.

- Projects clear safety messages and symbols onto floors or walls
- Maintenance-free alternative to tape and painted markings
- Compatible with standard and custom GOBO lenses

CUSTOMIZE IT!

custom solution!

LED Line Projectors

Precision laser technology creates crisp, high-contrast lines for long-distance aisle marking and traffic control. Ideal when accuracy, consistency, and superior visibility matter most.

- Projects sharp, high-contrast lines on any surface
- Long line lengths with the highest installation range
- Low power draw with long illumination lifespan

Available colors:

Laser Line Projectors

A durable, bulb-based solution for projecting wide, highly visible lines at lower mounting heights. Perfect for replacing floor tape in work zones, staging areas, and equipment boundaries.

- Wide projected lines for clear zone definition
- Long-lasting bulb with minimal maintenance
- IP65 rated for dust and moisture resistance

Available colors:

Heavy Duty Sign Projectors

Built for harsh, high-demand environments, heavy-duty projectors deliver reliable performance in dusty conditions and extreme temperatures—without sacrificing visibility or lifespan

- Designed for dusty, high-temperature industrial environments
- Operates from -40°F to 140°F with long-life illumination
- IP65 rated for durability and environmental protection
