### 7' TRIPOD KIT SYSTEM

Ritz Fall Protection introduces the 7' Tripod Kit System. Whether required to access a confined space or an accident requires the extraction of incapacitated personnel, versatility and ease of use make this portable Tripod Kit - 7ft System an ideal solution for many confined space and rescue applications. The Tripod Kit features inner and outer telescopic legs for height adjustment, locking pins near SS cables, securely connected eye bolts for PPE connection, two pulley systems, swivel anchorage eye on 3-way SRL, and a swivel steel snap hook with load indicator on 3-way SRL. 60' Galvanized Wire Cable features a mounting plate with four bolts to mount to Davit arm, a swivel steel snap hook connector, and a handle rotating mechanism for lifting or lowering. Complete with 60' winch for additional support. Ideal for ensuring secure and efficient operations during confined space entry and emergency rescue situations.

#### FEATURES

- Adjustable height from 1.25m (49.21") to 2.24m (88.18")
- Wide telescoping legs for challenging areas
- At minimum height, distance between legs (foot point) Ø1.21m (47.63")
- At maximum height, distance between legs (foot point) Ø2.0m (78.74")
- 50' 3 WAY SRL
- 60' Winch w/Bracket
- Swivel steel snap hook with Load Indicator at attachment end
- 50 ft. galvanized steel wire rope

#### TECH SPECS

<b>Material</b>	Prime Quality Aluminum Alloy and Stainless Steel for locking pins
<b>Load Capacity</b>	310 lbs.
<b>Strength</b>	5000 lbs.
<b>Item Weight</b>	42 lbs.
<b>Compliance</b>	OSHA and ANSI Z359.18-2017
